Exercise 5

This is Exercise #5, lecture on CSS Grid, used in the course [IDATA2301 Web technologies](#) at NTNU, campus Aalesund.
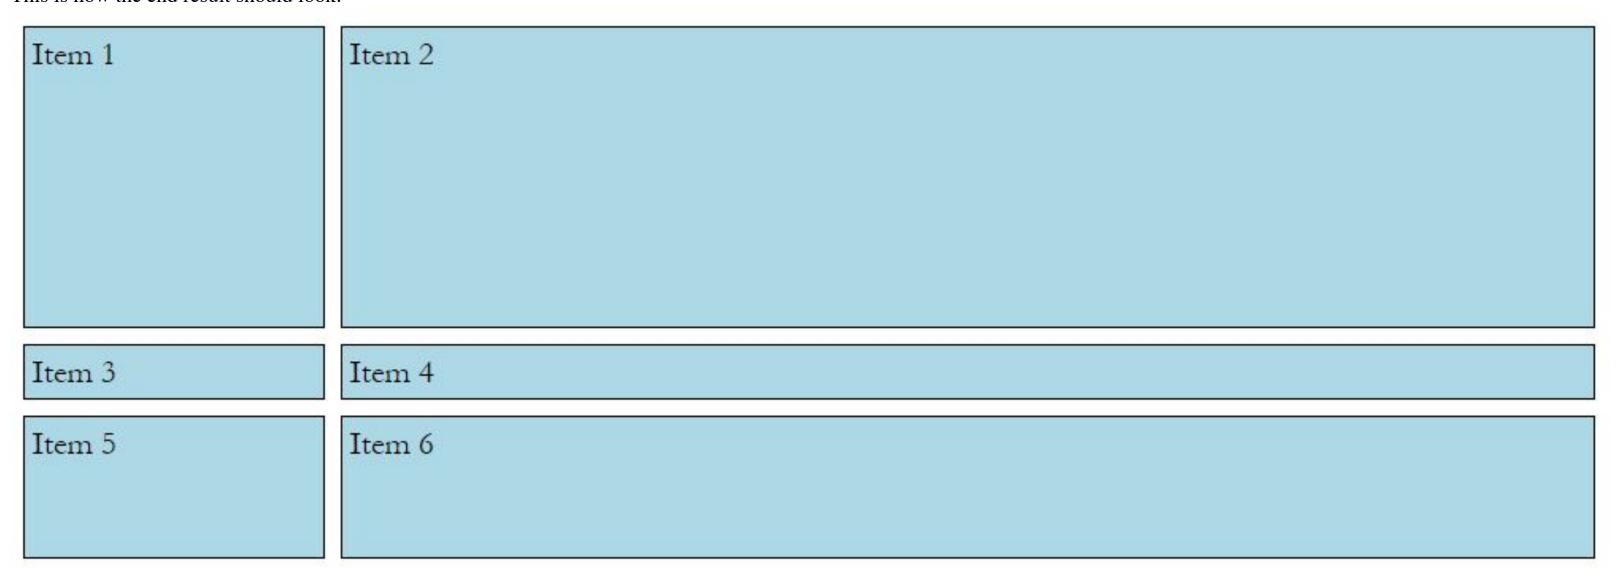

Go [back to exercise list](#).

Purpose

The purpose of the exercise is to get started with the Grid layout.

Instructions

Start with this document as the template. Arrange the provided elements in a grid according to the following specification:

1. You should be able to solve the exercise by simply creating CSS style for the grid container (div with `id="main-grid"`, nothing else.
2. The first row must be 200px high, the third row must be 100px high. The second row should be flexible - fill the whole available height. Note: the whole grid should fit the whole parent container (see the dashed light-blue border).
3. The first column must be 200px wide while the second column should fill the whole available width.
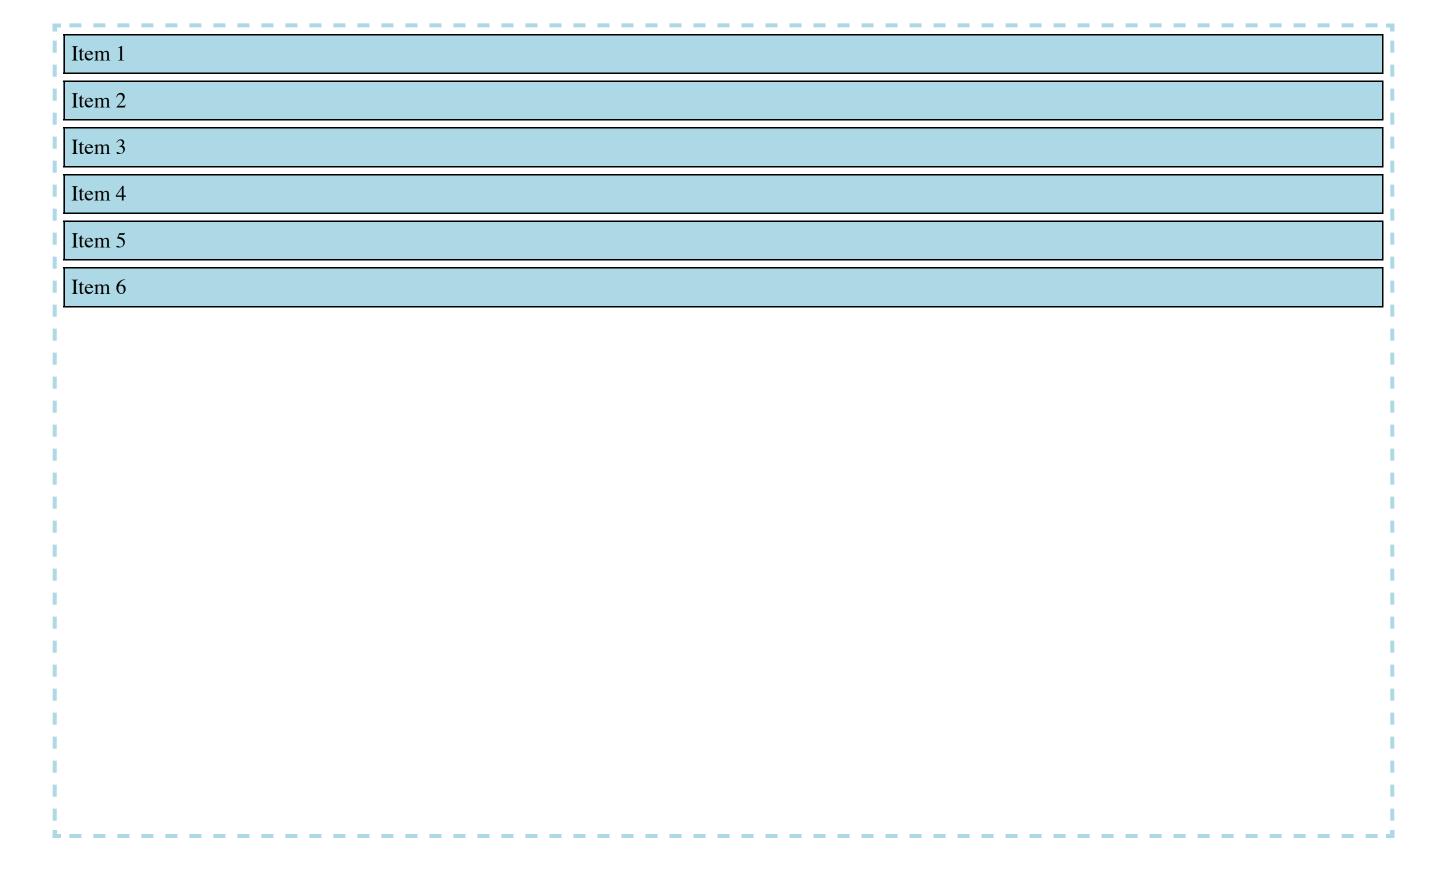

This is how the end result should look:

Item 1	Item 2
Item 3	Item 4
Item 5	Item 6

The following CSS properties may be handy:

```
display: grid;
grid-template-rows
grid-template-columns
```

Template

Use this file as the template.

Here is the grid:

Item 1
Item 2
Item 3
Item 4
Item 5
Item 6

Solution

You can find a solution in `../solutions/ex05-solution.html`.
